1	Graduate School of Human-Environment Studies	College of Engineering, Pusan National University	Korea	Doctor	3 years	Pusan National University (PNU) is a national comprehensive university located in Busan, a major city in southern South Korea. As a "hub" university connecting the local and global communities, PNU offers cutting-edge education and research across diverse academic fields. The university particularly focuses on fields aligned with the Fourth Industrial Revolution, such as artificial intelligence, big data, and robotics, as well as environmental and energy sciences and life sciences. PNU is dedicated to nurturing talent capable of thriving on the global stage.	Student Affairs Division (Graduate School of Human-Environment Studies) Email: jbkkyomu1ed@jimu.kyushu-u.ac.jp
2	Interdisciplinary Graduate School of Engineering Sciences	Faculty of Science, University of Antwerp	Belgium	Doctor	3 years	The University of Antwerp is an internationally recognized institution located in the city of Antwerp in the northern Flemish region of Belgium. Known for its high academic standards in research and education, the university plays a key role in the European academic network. It prioritizes international academic exchange, creating an environment where diverse researchers and students come together. Here, cutting-edge research is seamlessly integrated with practical learning, allowing students to acquire specialized knowledge and skills across various fields.
